

University April 2020 Import Review Report

Anonymized PDF version of the import package. Use this for review where CSV files are not opening correctly.

Important: This report is based on anonymized import package data. It is not certified accounting data. Manual certification is required before importing into the official database.

1. Executive Summary

Period	Status	FX rate	Daily sheets	Ignored sheets
2020-04	DRAFT_REQUIRES_MANUAL_CERTIFICATION	118.27	18	6
Transactions extracted	Ready for certification	Needs review	Manual review items	Validation failed
128	121	7	9	0
Opening RSD equiv.	Inflows RSD equiv.	Outflows RSD equiv.	Net movement	Closing RSD equiv.
944,065.24	1,102,552.40	1,805,201.36	-702,648.96	241,416.28

Import Source and Status

Field	Value
Source workbook	30.04.2020..xlsx
Period	2020-04
Package status	DRAFT_REQUIRES_MANUAL_CERTIFICATION
Company code	UNIVERSITY_DEMO
Applied template	University Monthly Cashflow Workbook - Draft v1 from March 2020
FX rate detected	118.27
Privacy status	Counterparties anonymized; raw names not included in this PDF package.

Financial Movement

Metric	Amount RSD equivalent
Opening position	944,065.24
Total inflows	1,102,552.40
Total outflows	1,805,201.36
Net cash movement	-702,648.96
Closing position	241,416.28
Monthly business revenue	1,102,552.40

Metric	Amount RSD equivalent
Monthly business expenses	1,733,831.36
Monthly financial income	
Monthly financial expenses	
Monthly owner payments	71,370.00
Monthly net result before tax	-702,648.96

Key Findings / Review Notes

#	Finding / Issue
1	The April workbook layout was successfully recognized using the March template.
2	Daily sheet totals matched extracted transaction rows.
3	Daily opening/closing balances are continuous across detected daily sheets.
4	April monthly status totals reconcile to the extracted daily inflows and outflows.
5	Two categories were not carried from March and need manual approval before they become reusable mappings: Doprinosi and Gorivo, struja.
6	This package uses anonymized counterparty tokens and should be used for demo/testing instead of the original workbook.

2. Validation Results

Purpose: show whether the extraction, totals, balance continuity, monthly status sheet, and formula controls passed or require review.

ID	Check	Status	Severity	Difference	Explanation / Action
VAL-APR2020-0001	source_file_readable	PASS	Low		The workbook XML was parsed and sheet list extracted.
VAL-APR2020-0002	march_template_available	PASS	Low		March draft template and mapping memory were loaded and applied.
VAL-APR2020-0003	daily_sheet_naming_template_match	REVIEW	Medium		April contains one or more date sheets with extra text. Parser handled this using date-substring detection, but the reusable template should be updated.
VAL-APR2020-0004	daily_sheets_detected	PASS	High		Detected 18 daily date sheets: Datum 02.04.2020., 03.04.2020., 06.04.2020., 07.04.2020., 08.04.2020., 09.04.2020., 10.04.2020., 13.04.2020., 14.04.2020., 15.04.2020., 16...
VAL-APR2020-0005	monthly_status_sheet_detected	PASS	High		Monthly status sheet was found.
VAL-APR2020-0006	fx_rate_detected	PASS	High		Exchange rate detected as 118.27.
VAL-APR2020-0007	daily_total_match_Datum 02.04.2020.	PASS	Low		Datum 02.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0008	daily_total_match_03.04.2020.	PASS	Low		03.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0009	daily_total_match_06.04.2020.	PASS	Low		06.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0010	daily_total_match_07.04.2020.	PASS	Low		07.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0011	daily_total_match_08.04.2020.	PASS	Low		08.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0012	daily_total_match_09.04.2020.	PASS	Low		09.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0013	daily_total_match_10.04.2020.	PASS	Low		10.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0014	daily_total_match_13.04.2020.	PASS	Low		13.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0015	daily_total_match_14.04.2020.	PASS	Low		14.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0016	daily_total_match_15.04.2020.	PASS	Low		15.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0017	daily_total_match_16.04.2020.	PASS	Low		16.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0018	daily_total_match_21.04.2020.	PASS	Low		21.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0019	daily_total_match_22.04.2020.	PASS	Low		22.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0020	daily_total_match_23.04.2020.	PASS	Low		23.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0021	daily_total_match_24.04.2020.	PASS	Low		24.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0022	daily_total_match_27.04.2020.	PASS	Low		27.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0023	daily_total_match_29.04.2020.	PASS	Low		29.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0024	daily_total_match_30.04.2020.	PASS	Low		30.04.2020.: extracted transaction sums match daily total rows.
VAL-APR2020-0025	cash_rollforward_Datum 02.04.2020.	PASS	Low	0.00	Datum 02.04.2020.: opening + inflows - outflows should equal closing balance.
VAL-APR2020-0026	cash_rollforward_03.04.2020.	PASS	Low	0.00	03.04.2020.: opening + inflows - outflows should equal closing balance.

8. Data Dictionary

Purpose: define the fields used in the import package and future Railway database screens.

Field	Definition	Example
transaction_id	Internal staged transaction/component identifier created by import package.	APR2020-00001
company_code	Demo company code used for anonymized package.	UNIVERSITY_DEMO
period	Accounting/reporting period inferred from workbook.	2020-04
transaction_date	Date parsed from daily sheet name.	2020-04-02
source_file	Original workbook file name.	30.04.2020..xlsx
source_sheet	Original sheet containing the row.	03.04.2020.
source_row_number	1-based row number in the original sheet.	5
source_component	Which amount column produced the transaction component.	bank_rsd
direction	Whether value is money in or money out.	inflow
payment_method	cash or bank based on source section.	bank
currency	Original transaction currency column.	RSD
original_amount	Amount in original column currency.	14100
fx_rate	FX rate applied to EUR rows; 1.0 for RSD rows.	118.27
amount_rsd_equivalent	Base reporting amount in RSD equivalent.	14100
counterparty_token	Anonymized stable token for original person/supplier/entity name.	PARTY_16EFF642
counterparty_type	Estimated party type based on category/context.	student/customer
raw_category	Company workbook category label carried from daily sheet section.	Rate
raw_purpose	Original purpose/description field, kept only if not personally identifying enough for demo; still needs privacy review.	rata
suggested_canonical_category	Suggested category in our standardized database/report model.	Tuition installments
suggested_report_section	Suggested report location for dashboard/reporting.	Operating revenue
mapping_confidence	Confidence level of mapping based on prior template/rules.	high
mapping_source	Whether the mapping was carried from March or newly suggested in April.	carried_forward_from_march_template
review_status	Whether row can be certified directly or requires review.	ready_for_certification
review_reason	Explanation of why row was flagged.	New category mapping suggested from April file.
