Key Findings / Review Notes

#	Finding / Issue
1	The May workbook layout was successfully recognized using the April v2 template rules.
2	May opening position matches April closing position, which supports month-to-month continuity.
3	Daily transaction extraction tied to the daily total rows for both inflows and outflows.
4	May monthly status totals reconcile to extracted daily inflows and outflows.
5	Monthly formula coverage produced 4 issue(s) requiring review.
6	1 category/direction pair(s) were not found in the previous template and need approval before automatic reuse.
7	This package uses anonymized counterparty tokens and should be used for demo/testing instead of the original workbook.

2. Validation Results

Purpose: show whether the extraction, totals, balance continuity, monthly status sheet, and formula controls passed or require review.

ID	Check	Status	Severity	Difference	Explanation / Action
VAL-MAY2020-0001	source_file_readable	PASS	Low		The workbook XML was parsed without using the original Excel formulas as source of truth.
VAL-MAY2020-0002	april_v2_template_available	PASS	Low		Template from the second month was loaded as mapping memory.
VAL-MAY2020-0003	daily_sheet_naming_template_match	PASS	Medium		v2 allows date substring detection; non-exact names are not blocking.
VAL-MAY2020-0004	daily_sheets_detected	PASS	High		Detected daily sheets: 04.05.2020., 05.05.2020., 06.05.2020., 07.05.2020., 08.05.2020....
VAL-MAY2020-0005	monthly_status_sheet_detected	PASS	High		Monthly status sheet is used as a control sheet, not the primary data source.
VAL-MAY2020-0006	fx_rate_detected	PASS	Medium		EUR values from daily sheets are converted to RSD equivalent using this rate.
VAL-MAY2020-0007	prior_month_closing_to_current_opening	PASS	High	0.00	May opening position should equal certified April closing position.
VAL-MAY2020-0008	daily_inflow_total_rows_vs_extracted_transac...	PASS	High	0.00	Compares daily sheet DNEVNI PRILIV totals to transaction rows extracted from the same sheets.
VAL-MAY2020-0009	daily_outflow_total_rows_vs_extracted_transa...	PASS	High	0.00	Compares daily sheet DNEVNI ODLIV totals to transaction rows extracted from the same sheets.
VAL-MAY2020-0010	daily_balance_continuity	PASS	High		Checks continuity across daily sheets.
VAL-MAY2020-0011	opening_plus_inflows_minus_outflows_equals_c...	PASS	High	0.00	Validates the overall cash/bank movement from first opening to final closing.
VAL-MAY2020-0012	monthly_inflow_total_vs_daily_sheets	PASS	High	0.00	Compares Mesecni promet inflow total to daily sheet inflow totals.
VAL-MAY2020-0013	monthly_outflow_total_vs_daily_sheets	PASS	High	0.00	Compares Mesecni promet outflow category totals to daily sheet outflow totals.
VAL-MAY2020-0014	statement_financial_result_formula	REVIEW	Medium	-820.00	Checks that financial activity result equals financial income minus financial expenses in the monthly status sheet.
VAL-MAY2020-0015	monthly_net_result_vs_daily_cash_movement	REVIEW	Medium	-820.00	Compares monthly status net result to extracted daily net cash movement; differences may be valid accounting timing differences or formula/design issues requiring review.
VAL-MAY2020-0016	monthly_formula_date_sheet_coverage	REVIEW	Medium		Checks for hidden monthly formula errors such as missing or duplicated daily sheet references.
VAL-MAY2020-0017	template_row_reuse_rate	PASS	Medium		Measures whether previous month mapping memory reduces manual work.
VAL-MAY2020-0018	new_categories_from_may	REVIEW	Medium		New category/direction pairs require approval before being reused automatically.

3. Manual Review Queue

Purpose: show only the records or controls that need human review before certification. Clean rows should not require line-by-line review.
